INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/EP2004/008260

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-19	YES
	Claims		NO
Inventive step (IS)	Claims		YES
	Claims	1-19	NO
Industrial applicability (IA)	Claims	1-19	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

1. This report makes reference to the following documents:

D1: GB-A-685371

D2: DE-A-10024154

2. The present application does not meet the requirements of PCT Article 33(1) because the subject matter of claim 1 does not involve an inventive step within the meaning of PCT Article 33(3).

2.1 D1 discloses (page 1, lines 12-16; page 2, line 48 to page 3, line 129; figures 1 and 2) a reactor bottom in the form of a collector funnel (reference sign 1) with an aperture (reference 19) and a displaceable closing part (reference sign 17), wherein the discharge channel (reference sign 17) is open when the closing part is lowered.

2.2 The subject matter of claim 1 thus differs from the reactor bottom known from D1 in that the closing part for the harvesting aperture neither forms nor contains the discharge channel.

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

2.3 The problem addressed by the present invention consists in providing a reactor bottom which permits or would permit a desired phase or capsule to be readily extracted from the reactor.

2.4 This problem is also solved by the reactor bottom described in D1. Consequently, no unexpected technical effect can be established for the subject matter of claim 1, which can therefore be considered only an obvious alternative for a person skilled in the art.

3. Dependent claims 2-19 do not contain any features which, in combination with the features of any claim to which they refer back, meet the PCT requirements for inventive step (see D1-D3 and the corresponding passages indicated in the search report). In particular, note that the use of a discharge unit in the process according to D3, as described in D1 or D2, would be an obvious measure to a person skilled in the art.
